Abstaining on low-confidence windows when EDA is missing (LOSO)
Gated + dropout (AURC 0.085)
LightGBM, NaN-trained (ii) (AURC 0.102)
LightGBM, ECG-only (iii) (AURC 0.162)
LightGBM, complete-trained (i) (AURC 0.141)
error if always predicting 'baseline'
random abstention, gated network (error=0.20)
oracle (gated network's errors abstained first)
Error rate on retained windows
Coverage (fraction of windows the model does not abstain on)
